Daily Life of a Student

As students arrive on campus in the morning, they are greeted by school personnel and report to their classrooms, where they will receive a brown bag breakfast. Students are expected to have their homework out while eating breakfast. During this time the teacher will take attendance and walk around the room checking the completion of each child's homework.

At 8:00am each morning, students will hear the morning announcements. The announcements will begin with selected students leading the staff and student body in reciting the mission and values of the school. Then the Head of School or Head of School designee will announce school news and upcoming special events.

The school day will begin with a morning assembly, where students hear announcements and are recognized for their academic accomplishments, as well as for exemplifying the school values.

In lower elementary grades, a student's day begins with Calendar Math in a morning meeting setting. Calendar Math is a bulletin board of various math-related tasks that usually use the current date, or the number of days in school, in order to complete the activity. The bulletin board is continuously built on throughout the year until students are completing all activities as a daily review. The spiraling nature of the program gives students plenty of opportunities to master a skill, and keeps the standards fresh all year.

Following Calendar Math in grades K-1 students receive ZooPhonics instruction. The Zoo-phonics Multisensory Language Arts Program is a kinesthetic, multi-modal approach to learning all aspects of language arts, including vocabulary development and articulation, based on phonics and phonemic awareness.

Students in all grades receive blocks of instruction of ELA and math for at least 85 minutes daily. All students receive at least 60 minutes of instruction in science and social studies daily. Throughout the school day, students are engaged in learning in a variety of classroom structures (large group, small group, learning centers, individual work, and projects). Students who need remediation of skills will receive instructional support from interventionists. The school day will include opportunity for students to use technology as a learning tool for independent research projects as well as part of the instructional program. All students will receive instruction in the arts and physical education as well.

One day a week, middle school students will be visited by their mentors, volunteers who will spend an hour with the students working on character education, college and career education, and self-esteem building activities.

At the end of the day, students enrolled in afterschool activities (choir, debate, garden club, art club, marching units) or sports (volleyball, soccer, flag football, baseball) will transition to the cafeteria where staff will be on hand to monitor students until they are picked up by their afterschool program instructor. All other students will be dismissed by their mode of transportation. At 4:30 a bus will transport afterschool program students home.

Tutoring will be held after school and on Saturdays to ensure that students are well supported in mastering grade level standards.
